

The mobile token now available at BBVA Pivot

With the new mobile token, integrated into the BBVA Pivot app, you will be able to generate security codes directly from your mobile phone. It will allow you to log in, upload files and sign global operations on the web and app, in a more agile way and with the same security as always.

What advantages does it have?

Flexibility

Sign with the device you always bring with you. Anytime, anywhere.

Security

Completely safe. Two-factor authentication just like you would with the physical token.

Free

Absolutely free, built-in functionality in the BBVA Pivot app.

How will you use it?

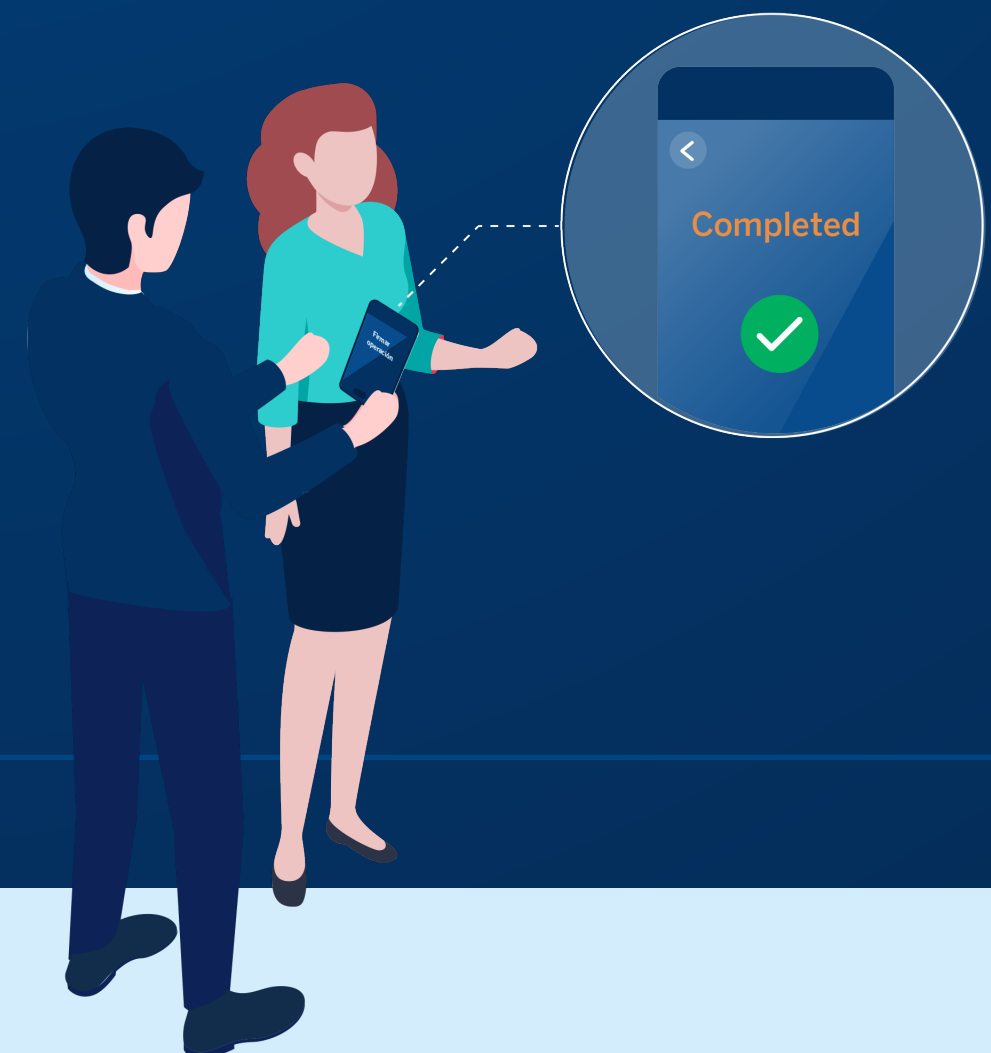

To access online banking

You will be able to log in to the BBVA Pivot Net platform.

Global operations

You will be able to sign and validate operations in your global banking.

Sign up for it!

To request more information or sign up, contact your customary BBVA sales agent or write an email to gcs@bbva.com
